

Effective Monitoring and Diagnostics for Renewables Plants

Keynote speaker: Dr. Mahesh Morjaria
EVP, Plant Operational Technology
Terabase Energy Inc

Mahesh Morjaria leads Terabase’s operational technology team, delivering SCADA, controls and related solutions for solar and hybrid fuel source systems. Prior to Terabase, he was the CEO of a First Solar spinoff. At First Solar, he led utility-scale solar R&D and grid integration activities for nearly a decade. Dr. Morjaria previously worked at GE for over twenty years in power systems including wind generation. He has extensive experience in Monitoring and Diagnostics technologies including the application of AI to wind & solar plants, power systems, aircraft engines and locomotives. His academic credits include B.Tech from IIT Bombay, and M.S. & Ph.D. in Engineering from Cornell University. He is a Senior IEEE member.
